■ Policy

Produce and analyze customer, product and product-component requirements.

- **Develop Customer Requirements**

Stakeholder needs, expectations, constraints and interfaces are collected and translated into customer requirements.

- **Develop Product Requirements**

Customer requirements are refined and elaborated to develop product and product-component requirements.

- **Analyze and Validate Requirements**

The requirements are analyzed and validated, and a definition of required functionality is developed.

■ Scope

All SW producing units in AVL SBU MES.

Affected projects are:

- **Standard SW development projects (main releases as well as sub-releases)**
- **Customer-specific SW development**

Not affected projects are:

- **Service Packs**
- **Hotfix packages, Patches**

- **Method:** *Plenum*
- **Timing:** *20'*
- **Form:** *Brainstorming and discussion*
- **Documents:** *none*
- **Deliverable:** *Documentation on flipchart (trainer)*

- **Questions:**

- I. How do we know that the process is performing well?*
- II. Who of you has experiences with this process?
Which one?*
- III. What are the most relevant work products?*

Roles

- PL-DP
- PL-CP
- GPM
- HOD
- STL
- SPL
- WPL
- RM

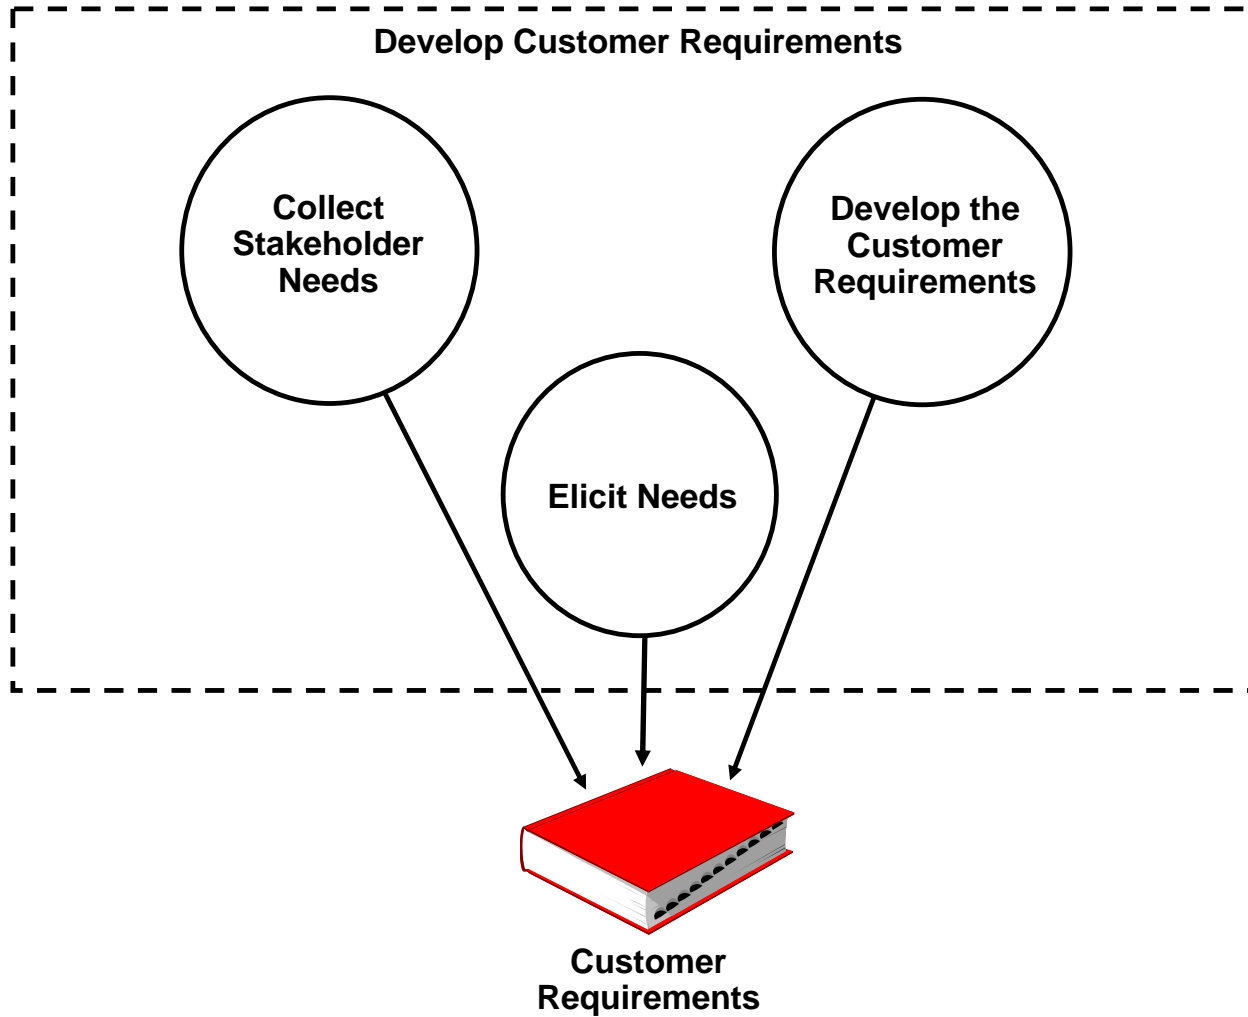

Activities

- Develop Customer Requirements
 - Elicit Needs
 - Develop Customer Requirements
- Develop Product Requirements
 - Establish Product and Product Component Reqmts
 - Allocate Product Component Requirements
 - Identify Interface Requirements
- Analyze & Validate Requirements
 - Establish Operational Concepts and Scenarios
 - Develop architecture requirements
 - Establish a definition of required functionality
 - Analyze Requirements
 - Analyze Requirements to achieve balance
 - Validate Requirements with comprehensive methods

- **Method:** *Small groups*
- **Timing:** *10' group work, 10' discussion in plenum*
- **Form:** *Group elaboration*
- **Documents:** *none*
- **Deliverable:** *Group notes*

- **Question:**

Work products are often developed iteratively, have a life cycle status, or are changed caused by requirements changes. According to the importance of the work product the degree of configuration management has to be defined.

- I. What degrees of configuration management do you use?*
- II. When do you define the configuration management for the work products?*

GP2.7 MANAGE CONFIGURATIONS

Place designated work products of the process under appropriate levels of configuration management.

Purpose:

Establish and maintain the integrity of the designated work products of the process (or their descriptions) throughout their useful life.

Practice:

- Identify the designated work products in the plan for performing the process, along with a specification of the level of configuration management (e.g.: version control, 'baseline' configuration management).
